

# CASE STUDY: XS NIGHTCLUB CUSTOM POOL COVER

The XS Nightclub at the Wynn in Las Vegas, NV has an expanded area to host concerts and performances thanks to its new pool cover, provided by Staging Concepts. This pool cover was custom designed to perfectly install into/ over the outdoor pool to provide a smooth surface for performers and guests.

To design the pool cover, we worked with Precision Display Services. Black polyvinyl was used for the platform sections to construct the surface of the pool cover, and custom tensiline guardrails were also supplied.

Safety is always a priority for all Staging Concepts' projects. To ensure performers and guests could enjoy the events with ease, all platforms were engineered to the appropriate live load.

This project was completed on a tight timeline to ensure it would be ready for the already booked performances at the XS Nightclub.
